Fiscal Estimate Narratives DOR 9/8/2011

LRB Number 11-2456/1	Introduction Number	AB-0220	Estimate Type	Original			
Description An income and franchise tax credit for workplace wellness programs, granting rule-making authority, and requiring the exercise of rule-making authority.							

Assumptions Used in Arriving at Fiscal Estimate

The bill would create a non-refundable income and franchise tax credit for employers who provide a workplace wellness programs for their employees in this state. The credit would be equal to 30 percent of the amount that an employer pays in the taxable year to provide a workplace wellness program to any of the employer's employees who are employed in this state, not including any amount paid to acquire, construct, rehabilitate, remodel, or repair real property. The credit may be claimed for three years. Under the bill the Department of Health Services would certify programs as eligible for the credit, and the Department of Revenue would determine the amount of credits to allocate to the businesses providing workplace wellness programs.

A workplace wellness program is a health or fitness program, as defined by administrative rule by the Department of Revenue and the Department of Health Services, where employees are provided with health risk assessments. The services included in a workplace wellness program include smoking cessation, weight management, stress management, worker injury prevention programs, nutrition education, health or fitness incentive programs, vaccinations, or employee physical examinations.

Under the bill the maximum amount of credit that may be claimed by all claimants is \$5 million per taxable year, with \$2.5 million per year being allocated to businesses with 50 or fewer employees and \$2.5 million per year being allocated to businesses with more than 50 employees.

The credit would be available for tax years starting on or after January 1, 2012. Unused credit amounts would be allowed to be carried forward for 15 years.

Fiscal Effect

it is assumed that the bill would result in claims of an estimated \$5 million per year, the maximum annual amount of credit allowed. Because the bill requires the credit to be added to income, the fiscal effect of the bill would be a reduction in revenue of an estimated \$4.6 million (\$5 million in credit claims - (\$5 million x 7.9% tax rate)). The fiscal effect in a taxable year would be reduced to the extent that taxpayers do not have sufficient tax liability to use all of the credit amounts claimed. In subsequent years, the fiscal effect could be greater than \$4.6 million if all of the credit claimed in the current year as well as credit amounts carried forward from previous years are used.

In addition, the Department would have annual administrative cost for certification and allocation of the credit of \$82,800 for one FTE auditor classification including salary, supplies, and services/overhead.

Long-Range Fiscal Implications
